# THE NATURE OF HORTOBÁGY

*The Puszta is not boring and not empty! However, to discover its values, you need to get a little closer.*

*We wish you a pleasant time here. Visit other interpretive sites and programs of the Hortobágy National Park.*

## Time travel? Yes, it's possible!

How did the cultural landscape of Hortobágy develop? Its significance is undeniable, as it represents universal values as a World Heritage site. This is the land of changing permanence. You can get a glimpse into key milestones in the interaction between humans and nature over nearly 40,000 years through a landscape model.

## Explore Hortobágy

Meanwhile, you can marvel at the truly colourful, mosaic fabric of habitats, as well as the sophisticated relationship between habitats and living beings. Its beauty and diversity alone are breathtaking, but it also makes you think: where does humanity fit into this system?

## What's happening beneath our feet?

You often hear about Hortobágy being a saline Puszta. But why is it saline? What is saline, anyway? We use technology to help solve this mystery.

## Everyone does it differently! Or do they?

Ranger, environmental educator, ecological researcher, herder – just a few of the many professions typical of the Hortobágy National Park. In fact, one thing connects these players and roles: they all have a passionate love for the Puszta. They share this passion through the screen.

## The World of Cranes

Have you ever been part of the autumn Crane migration? Have you shivered from the calls of thousands of birds? These experiences can only be gained in nature. However, there is more to learn about these noble birds: their nesting, migration, their body structures perfectly adapted to their lifestyle and some of their specific details. Interactive elements make this rich content even more interesting.

## Bird Paradise

The birdlife of Hortobágy is much richer than including only Cranes. With the help of virtual reality, you can witness rarely seen species and special moments in their lives. This is a privilege granted to only a few, even in nature!

The birdlife of Hortobágy is sensitive to environmental influences. Species like the White-tailed Eagle or even the Crane bear witness to this. But what happened to them? Some disappeared, some appeared as newcomers. Let's find out their stories together with a little investigation!

## A real spectacle

From the infinite horizon of the Puszta, we raise our gaze to the sky. The nighttime glow of the stars, the wind-blown 'mud dragon,' or the mirage caused by the sizzling summer air are only a few of the phenomena that define the atmosphere of Hortobágy. Which one captivates you the most?

## Together as a Family

The entire exhibition is an excellent family program, but we've also thought of the little ones. They can playfully learn about a year in the life of Soslík or engage in simple logic tasks to guide them in exploring nature.

## Beyond words

In addition to things to see and read, hands-on models and games make the exhibition even more experiential. You can also smell the scents of the Puszta or create a unique rhythm and melody from the sounds of the Puszta.

## You can also enjoy additional services in the building:

3D cinema: a series of films covering the entire year of Hortobágy's wildlife and natural treasures – each screening presents the current season. The length of each film is 15 minutes, available in Hungarian, English and German.

Information

Ticket purchase: entrance tickets, programs

Gift shop: local handmade products, specialty books, maps, outdoor clothing (limited), national park and trademarked products, regional delicacies - cheeses, salami, and sausages

Café: Italian coffee specialties, artisan ice cream, and cold drinks

World Heritage playground (in the courtyard next to the café)

Luggage storage

VR Birdwatching room

## SNIFF DETECTOR

The scents and smells of the puszta. Which one is pleasant and which one do you dislike? Is any of them familiar to you? Or are they all strange and alien?
